odin3 CLI
(scripts: -p "..." or .o3)
C plugin .so
odin3_plugin_init(abi)
registers passes, cell types
Python (cffi, ABI mode)
plugins/python/odin3.py
executable hooks
IR as JSON on stdin/stdout
(Phase 7)
slang adapter .so (C++)
odin3_read_slang
(Phase 5)
include/odin3/odin3.h: ABI v4, 125 functions
opaque odin3_design; uint32_t IDs + module handle;
odin3_status returns; out-pointers; no attributes in the cdef block
libodin3.so (hidden visibility; ODIN3_EXPORT on src/api definitions)
pass manager: provenance run, check before and after, timing
odin3_core objects: util, ir, ast, frontends, passes, backends, sim, techlib
